IR CODES 34

TO CONTROL MULTIPLE PRODUCTS 36

- Connecting the Cable 36
- Communication Parameter 37
- Command Reference List 38
- Transmission/Reception Protocol 41

To obtain the source code under GPL, LGPL, MPL, and other open source licenses, that is contained in this product, please visit <http://opensource.lge.com>.

In addition to the source code, all referred license terms, warranty disclaimers and copyright notices are available for download. LG Electronics will also provide open source code to you on CD-ROM for a charge covering the cost of performing such distribution (such as the cost of media, shipping, and handling) upon email request to opensource@lge.com. This offer is valid for three (3) years from the date on which you purchased the product.

! NOTE

- The software-related contents may be changed without prior notice due to upgrade of the product functions.
- Some features described in the User Guide may not be supported in certain models.
- SNMP 2.0 is supported.

User Settings

Main Menu Settings

Picture Settings

To Select Picture Mode

SETTINGS / ⚙️ →  → Picture → Picture Mode Settings → Picture Mode

Select the picture mode that is best suited to the video type.

- **Vivid:** adjusts the video image for a retail environment by enhancing the **contrast, brightness, and sharpness.**
- **Standard:** adjusts the video image for a normal environment.
- **APS:** APS (Auto power saving) mode reduces power consumption by dimming control.
- **Cinema:** optimizes the video image for watching movies.
- **Sports:** optimizes the video image for watching sports. Even fast actions such as kicking or throwing a ball are rendered clearly on the screen.
- **Game:** optimizes the video image for playing videogames.
- **Photo:** Optimizes the screen for viewing photos. (This feature is available only with certain models.)
- **Expert/Calibration:** allows an expert, or anyone interested in high quality pictures, to manually tune the picture for the best picture quality.

! NOTE

- Depending on the input signal, the available **Picture Modes** may differ.
- **Expert** is an option that allows a picture quality expert to fine-tune the picture quality using a specific image. Thus, it may not be effective for a normal picture.

To fine-tune the picture mode

SETTINGS /  →  → Picture → Picture Mode Settings → Customize

- **Backlight/OLED LIGHT:** adjusts the brightness of the screen by controlling the LCD backlight. The closer the value is to 100, the brighter the screen is.
- **Contrast:** adjusts the difference between the light and dark areas of the picture. The closer the value is to 100, the greater the difference is.
- **Brightness:** adjusts the overall brightness of the screen. The closer the value is to 100, the brighter the screen is.
- **Sharpness:** adjusts the sharpness of the edges of objects. The closer the value is 50, the clearer and the sharper the edge becomes.
- **H Sharpness:** adjusts the sharpness of the contrast edges on the screen from a horizontal point of view.
- **V Sharpness:** adjusts the sharpness of the contrast edges on the screen from a vertical point of view.
- **Color:** softens or deepens the tints on the screen. The closer the value is 100, the deeper the colors become.
- **Tint:** adjusts the balance between red and green levels displayed on the screen. The closer the value is to Red 50, the deeper the color red becomes, and the closer the value is to Green 50, the deeper the color green becomes.
- **Color Temperature:** adjusts the tints of the screen to evoke feelings of warmth or coolness.
- **Advanced Controls/Expert Control:** customizes the advanced options.
 - **Dynamic Contrast:** Optimizes the difference between the light and dark parts of the screen according to the brightness of the image.
 - **Super Resolution:** Sharpens the blurry or indistinguishable parts of the picture.
 - **Color Gamut:** Selects the range of colors to display.
 - **Dynamic Color:** Adjusts the tint and saturation of the image for a more vivid and lively display.
 - **Edge Enhancer:** Provides much sharper and clearer edges to the picture.
 - **Color Filter:** Accurately adjusts color and tint by filtering a specific color area of RGB space.
 - **Preferred Color:** Adjusts the skin tint, grass tint, and sky tint to your preference.
 - **Gamma:** Adjusts the medium brightness of the image.
 - **White Balance:** Adjusts the overall tint of the picture to your preference. In Expert mode, you can fine-tune the picture using the Method/Pattern options.
 - **Color Management System:** Experts use the color management system when they adjust the colors by using the test pattern. The color management system allows you to make an adjustment by selecting from among 6 different color spaces (Red/Yellow/Blue/Cyan/Magenta/Green) without affecting other colors. You may not see tints change in a normal picture even after adjustment.

- **Picture Options:** customizes the picture options.
 - **Noise Reduction:** Removes irregularly generated tiny dots for a clear picture.
 - **MPEG Noise Reduction:** Reduces the noise produced while creating digital video signals.
 - **Black Level:** Adjusts the black level of the picture to correct the brightness and contrast of the picture.
 - **Real Cinema:** Optimizes the video image for a cinematic look.
 - **Motion Eye Care:** Reduces eye fatigue by adjusting brightness levels and lessening blurriness based on the displayed image.
 - **LED Local Dimming:** Brightens the brighter parts of the image and darkens the darker parts, maximizing contrast. Turning this feature off may lead to increased power consumption. (Only applies to certain models.)
 - **TruMotion:** Reduces image shaking and image sticking that can occur with moving images.

NOTE

- You can adjust advanced settings only in the **User** mode.
- Depending upon the input signal or the selected picture mode, the available options may differ.

To set the aspect ratio,

(Some features may not be supported in certain models.)

SETTINGS /  →  → Picture → Aspect Ratio

Changes the aspect ratio to view the image in its optimal size.

- **16:9:** displays the image with a 16:9 aspect ratio.
- **Just Scan:** displays the image in the original size without cutting off the edges.
Original is available in HDMI (720p or higher) mode. (On 58:9 models, this option can be selected regardless of the input signal.)
- **Original:** automatically changes the aspect ratio to 4:3 or 16:9 depending on the input video signal.
- **4:3:** displays the image with a 4:3 aspect ratio.
- **58:9:** Displays the screen with a 58:9 aspect ratio.
- **Vertical Zoom:** Adjusts the height and vertical position of the displayed image.
- **All-Direction Zoom:** Adjusts the horizontal/vertical/diagonal dimensions and horizontal/vertical position of the displayed image.

CAUTION

- If a fixed image is displayed on the screen for a long period of time, it will be imprinted and become a permanent disfigurement on the screen. This image burn or burn-in is not covered by the warranty.
- If the aspect ratio is set to **4:3** for a long period of time, image burn may occur on the letterboxed area of the screen.
- The options may differ depending on the model.
- Depending on the input signal, the available aspect ratio may differ.
- When you adjust **Vertical Zoom** or **All-Direction Zoom**, the screen may flicker for some input signals.

To use the Energy Saving function

SETTINGS / ⚙️ → ⋮ → Picture → Energy Saving

Reduces power consumption by adjusting peak screen brightness.

- **Auto:** adjusts the brightness of the monitor according to ambient light. (This feature is available only with certain models.)
- **Off:** disables the Energy Saving mode.
- **Minimum/Medium/Maximum:** uses the Energy Saving according to the Energy Saving level specified for your monitor.
- **Screen Off:** turns off the screen. You will only hear audio. You can turn on the screen again by pressing any button on the remote control except the power button.

To use the Smart Energy Saving function

(Only applies to certain models.)

SETTINGS / ⚙️ → ⋮ → Picture → Smart Energy Saving

According to picture brightness, the brightness of the monitor will be adjusted automatically to save energy.

- **Off:** disables the Smart Energy Saving function.
- **On:** enables the Smart Energy Saving function.

Configuring the OLED Display

[For OLED models only]

SETTINGS / ⚙️ → ⋮ → Picture → OLED Panel Settings

- **Clear Panel Noise:** Corrects issues that may arise when the screen is turned on for a long period of time.

To use the SCREEN(RGB-PC) function

(Only applies to certain models.)

SETTINGS / ⚙️ → ⋮ → Picture → SCREEN(RGB-PC)

Customizes the PC display options in RGB mode.

- **Set Automatically:** Sets to adjust the screen position, clock, and phase automatically.
The displayed image may be unstable for a few seconds while the configuration is in progress.
- **Resolution:** Selects a proper resolution.
- **Position/Size/Phase:** Adjusts the options when the picture is not clear, especially when characters are shaky, after the auto configuration.
- **Reset:** Restores the options to the default setting.

Sound Settings

- Only applies to certain models.

To select a Sound Mode

SETTINGS /  →  → Sound → Sound Mode

The best sound quality will be selected automatically depending on the video type currently being watched.

- **Standard:** this sound mode works well for content of all types.
- **Cinema:** optimizes sound for watching movies.
- **Clear Voice III:** Enhances voices so they can be heard more clearly.
- **Sports:** optimizes sound for watching sports.
- **Music:** optimizes sound for listening to music.
- **Game:** optimizes sound for playing videogames.

To use the Sound Effects function

SETTINGS /  →  → Sound → Sound Mode Settings

- **Equalizer:** manually adjust sound by using the equalizer.
- **Balance:** adjust the output volume for the left speaker and the right speaker.
- **Reset:** reset the sound settings.

Selecting Sound Output Device

SETTINGS /  →  → Sound → Sound Out

- **Signage Speaker:** You can output sound through the signage monitor's internal speakers. This feature is available only for models with built-in signage speakers.
- **LG Sound Sync / Bluetooth:** You can connect Bluetooth audio devices or Bluetooth headsets wirelessly to enjoy richer sound from the signage monitor conveniently.

NOTE

- Some recently connected devices may automatically attempt to reconnect to the Signage monitor when it is turned on.
- It is recommended that you set LG audio devices that support LG Sound Sync to LG TV mode or LG Sound Sync mode before connecting.
- This feature is only available on certain models.
- Press **Device Selection** to view the devices that are or that can be connected and connect other devices.
- You can use the signage remote control to adjust the volume of the connected device.
- If the audio device fails to connect, check that it is switched on and available for connection.
- Depending on the type of Bluetooth device, the device may not connect correctly or a malfunction such as unsynchronized video and audio may occur.
- Sound may stutter or sound quality may be reduced if:
 - The Bluetooth device is too far from the signage monitor.
 - There are objects obstructing the Bluetooth device and signage monitor.
 - The device is used in proximity to other radio devices such as a microwave oven or wireless LAN router.

To select a Volume Increase Rate,

SETTINGS /  →  → Sound → Volume Mode → Volume Increase Amount

You can set the volume range by selecting any of **Low/ Medium/ High**.

To sync audio with video

SETTINGS /  →  → Sound → AV Sync Adjustment

- **Signage Speaker:** adjusts the sync between video and audio coming from external speakers, such as those connected to the digital audio output port, LG audio equipment, or headphones. From the default value, the closer the value is to -, the faster the sound output becomes, and the closer the value is to +, the slower the sound output becomes.
- **Bypass:** audio coming from external devices without delay. Audio may be outputted earlier than video due to the processing time for video that is inputted into the monitor.

Network Settings

To Set a Signage Monitor Name

SETTINGS / ⚙️ → ⋮ → Network → Signage Name

You can set a name for Signage Monitor that will be used on the network by using the on-screen keyboard.

To Set Your Wired Network

SETTINGS / ⚙️ → ⋮ → Network → Wired Connection (Ethernet)

- **Connecting to a wired network:** Connect your monitor to a local area network (LAN) via the LAN port, and configure the network settings. Only wired network connections are supported. After making a physical connection, a small number of networks may require the display network settings to be adjusted. For most networks, the display will automatically make a connection without any adjustments. For detailed information, contact your Internet provider or consult your router manual.

Setting a Wireless Network

(Only applies to certain models.)

SETTINGS / ⚙️ → ⋮ → Network → Wi-Fi Connection

If you have set the monitor up for a wireless network, you can check and connect to the available wireless Internet networks.

- **Add a Hidden Wireless Network:** If you input the name of network directly, you can add a wireless network.
- **Connect via PBC:** Connects easily when the button of a wireless AP supporting PBC is pressed.
- **Connect via PIN:** Connects easily when the PIN of the wireless AP that you wish to connect to is entered in to the AP configuration webpage.
- **Advanced Settings:** If you input the information of network directly, you can enter a wireless network. If there is no wireless network available, click **Advanced Settings**. You can add a network.

Setting up a SoftAP

(Only applies to certain models.)

SETTINGS / ⚙️ → ⋮ → Network → SoftAP

If you set up a SoftAP, you can connect many devices via a Wi-Fi connection without a wireless router and use wireless Internet.

- To use SIGNAGE, you must have an Internet connection.
- You cannot use the SoftAP feature and the Screen Share feature at the same time.
- On models that support Wi-Fi dongles, the SoftAP menu is enabled only when a Wi-Fi dongle is connected to the product.
- SoftAP connection information
 - SSID: A unique identifier necessary to make a wireless Internet connection
 - Security key: The security key you enter to connect to the desired wireless network
 - Number of connected devices: Shows the number of devices currently connected to your Signage device via a Wi-Fi connection. Up to 10 devices are supported.

Tips for Network Setting

- Use a standard LAN cable (Cat5 or higher with a RJ45 connector) with this display.
- Many network connection problems during set-up can often be fixed by re-setting the router or modem. After connecting the display to the home network, quickly power off and/or disconnect the power cable of the home network router or cable modem, then power on and/or connect the power cable again.
- Depending on the Internet Service Provider (ISP), the number of devices that can receive Internet service may be limited by the applicable terms of service. For details, contact your ISP.
- LG is not responsible for any malfunction of the display and/or the Internet connection feature due to communication errors/malfunctions associated with your Internet connection, or other connected equipment.
- LG is not responsible for problems with your Internet connection.
- You may experience undesired results if the network connection speed does not meet the requirements of the content being accessed.
- Some Internet connection operations may not be possible due to certain restrictions set by the Internet Service Provider (ISP) supplying your Internet connection.
- Any fees charged by an ISP including, without limitation, connection charges are your responsibility.

NOTE

- If you want to access the Internet directly on your display, the Internet connection should always be on.
- If you cannot access the Internet, check the network conditions from a PC on your network.
- When you use Network Setting, check the LAN cable or check if DHCP in the router is turned on.
- If you do not complete the network settings, the network may not function correctly.

CAUTION

- Do not connect a modular telephone cable to the LAN port.
- Since there are various connection methods, please follow the specifications of your telecommunication carrier or Internet Service Provider.
- Network Setting menu will not be available until the display is connected to a physical network.

Tips for Wireless Network Setting

- Wireless networks can be subject to interference from other devices operating at a frequency of 2.4 GHz (wireless phones, Bluetooth devices or microwave ovens). There may also be interference from devices with a frequency of 5 GHz, same as other Wi-Fi devices.
- The surrounding wireless environment can cause the wireless network service to run slowly.
- If you do not turn off the entire local home network, network traffic may occur on some devices.
- For an AP connection, an access point device that supports wireless connection is required and the wireless connection feature must be enabled on the device. Contact your service provider regarding availability of wireless connection on your access point.
- Check the SSID and security settings of the AP for AP connection. Refer to the appropriate documentation for SSID and security settings of the AP.
- Invalid settings on network devices (wired/wireless line sharer, hub) can cause the monitor to run slowly or not operate properly. Install the devices correctly according to the appropriate manual and set the network.
- Connection method may differ according to the AP manufacturer.

General Settings

To configure the language

SETTINGS /  →  → General → Menu Language

Select one of the languages on the menu displayed on the screen.

- **Menu Language:** sets a language for Signage.

Setting up the keyboard language

SETTINGS /  →  → General → Keyboard Languages

Select the language you wish to show on the keyboard.

- **Keyboard Languages:** Sets the keyboard language.

To set the time/date

SETTINGS /  →  → General → Time & Date

You can check or change the time.

- **Set Automatically:** You can set Time and Date.
- **Daylight Saving Time:** You can set Start Time and End Time for Daylight Saving Time. The DST start/end settings work only when you set them more than one day apart from each other.
- **Time zone:** You can change the settings for Continent, Country/Territory, and City.

To turn your monitor on or off automatically

SETTINGS /  →  → General → Timers

You can set the On/Off Timer for your monitor.

- **On Timer:** you can set the time when your monitor turns on.
- **Off Timer:** you can set the time when your monitor turns off.
- **No Signal Power Off (15Min):** When there is no input source, the monitor will automatically turn off after 15 minutes. If you don't want it to turn off automatically, set No Signal Power Off to **Off**.
- **Auto Power Off:** When there is no key input, the monitor will automatically turn off.

NOTE

- On Time/Off Time can be saved for up to seven schedules; the monitor is turned on or off at the preset time in the schedule list. If multiple preset times are stored in the schedule list, this function works at the nearest time from the current time.
- Once the on or off time is set, these functions operate daily at the preset time.
- The scheduled power-off function works properly only when the device time is set correctly.
- When the scheduled power-on and power-off times are the same, the power-off time has priority over the power-on time if the set is turned on, and vice versa if the set is turned off.

Configuring Set ID

SETTINGS /  →  → General → Set ID

- **Set ID (1 to 1000)**: Assigns a unique Set ID number to each product when several products are connected for display. Assign numbers ranging from 1 to 1000 and exit the option. You can control each product separately by using the Set ID you assigned to each product.
- **Auto Set ID**: Automatically assigns a unique Set ID number to each set when several products are connected for display.
- **Reset Set ID**: Resets the Set ID of the product to 1.

Using Tile Mode

(Only applies to certain models.)

SETTINGS /  →  → General → Tile Mode

You can configure the integrated screen in the same way as each screen is configured.

- **Row (1 to 15)**: Sets the number of tile rows.
- **Column (1 to 15)**: Sets the number of tile columns.
- **Tile ID (1 to 225)**: Sets the Tile ID. The ID you selected will be displayed on the screen.
- **Natural**: For a more natural display, the image is partly omitted to account for the distance between the screens.
- **Natural Size**: Sets the distance between screens for Natural mode.
- **Reset**: Resets the tile settings to 2 x 2.

NOTE

- If Tile mode is set to On, Smart Energy Saving mode will be disabled to provide the same picture quality as other displays.
- Only 4 x 4 is available for certain models. (For 1080p or higher.)
- To use this function, the product:
 - Must be displayed with other products.
 - Must be operated by connecting to each display via a distributor or DP daisy chain.
 - Tile Mode: Horizontal x Vertical (Horizontal = 1 to 15, Vertical = 1 to 15)
 - 15 x 15 is available

Configuring the Dual-View Screen

[For double-sided flat OLED models only]

SETTINGS / ⚙️ → ⋮ → General → Dual-View Screen Setting

- **Front Screen Name:** Sets the name of the front screen.
- **Back Screen Name:** Sets the name of the back screen.
- **Screen Swap:** Swaps the images on the front and back side of the screens.
- **Screen Mirroring:** Copies the image of the current screen to the opposite screen.
- **Screen Off:** Turns off the front or back screen.
- **Clone All Settings:** Copies all settings for the front screen to those for the back screen. This option is only enabled for the front screen.

To reset your monitor settings

SETTINGS / ⚙️ → ⋮ → General → Reset to Initial Settings

Resets all monitor settings.

Using UHD Deep Color

[For Ultra HD models only]

SETTINGS / ⚙️ → ⋮ → General → UHD Deep Color

If you connect an HDMI or DP device to one of the Deep Color adjustable ports, you can select between Ultra Deep Color On (6G) or Off (3G) in the UHD Deep Color settings menu.

If a compatibility issue occurs with the graphics card when the Deep Color option is set to On at 3840 x 2160 @ 60 Hz, set the Deep Color option to Off.

- HDMI and DP specifications may vary depending on the input port. Check the specifications of each device before connecting.
- HDMI input ports 1 and 2 are best suited for specifications for high definition 4K @ 60 Hz (4:4:4, 4:2:2) video. However, video or audio may not be supported depending on the specifications of the external devices. If this is the case, please connect to a different HDMI port.

ENTERTAINMENT

Using Multimedia Features

Connecting USB/SD Storage Devices

Connect a USB storage device such as a USB flash memory, SD storage devices or an external hard drive to the display and use multimedia features.

CAUTION

- Do not turn the monitor off or remove the USB storage device while **Photo & Video** or **Music** is playing.
- Back up files you have saved on a USB storage device frequently, as loss or damage to the files may be not covered by the warranty.

Tips for using USB/SD storage devices

- Only a USB storage device can be recognized.
- A USB device does not work effectively when it is connected via a USB hub.
- A USB storage device using an automatic recognition program may not be recognized.
- A USB storage device using its own driver may not be recognized.
- The recognition speed of a USB storage device may depend on each device.
- Please do not turn off the display or unplug the USB storage device when the connected device is working. If the USB storage device is suddenly disconnected, the stored files or the device itself may be damaged.
- Please do not connect a USB storage device which was modified to work on a PC. The device may cause the monitor to malfunction or the content fail to be played. Use only a USB storage device which contains normal music, image or video files.
- A USB storage device formatted as a utility program not supported by Windows may not be recognized.
- A USB storage device (over 0.5 A) which requires an external power supply must be connected to a power supply separately. If it is not, the device may not be recognized.
- Please connect the USB storage device using the cable provided by the device manufacturer.
- Some USB storage devices may not be supported or operate smoothly.
- File alignment method of USB storage devices is similar to that of Window XP and filenames can recognize up to 100 English characters.
- Back up important files regularly as data stored on a USB storage device may be damaged. We will not be responsible for any data loss.
- If the USB HDD does not have an external power source, the USB device may not be detected. To ensure the device is detected, connect the external power source.
 - Please use a power adapter for an external power source. We do not provide a USB cable for an external power source.
- If your USB storage device has multiple partitions, or if you use a USB multi-card reader, you can use up to four partitions or USB storage devices.
- If a USB storage device is connected to a USB multi-card reader, its volume data may not be detected.
- If the USB storage device does not work properly, disconnect and reconnect it.
- Detection speed differs from device to device.
- If the USB storage device is connected in Standby Mode, the specific hard disk will automatically be loaded when the display is turned on.
- The recommended capacity is 1 TB or less for a USB external hard drive and 32 GB or less for USB memory stick.
- Any device with more than the recommended capacity may not work properly.
- If a USB external hard drive with an "Energy Saving" function does not work, try turning the hard drive off and on again.
- USB storage devices below USB 2.0 are also supported but may not function correctly in the Videos.
- A maximum of 999 sub-folders or files can be recognized under one folder.
- The SDHC type for SD cards is supported. To use an SDXC card, format it to the NTFS file system first.
- The exFAT file system is not supported for SD cards and USB storage devices.
- Certain models do not support SD cards.

Photo & Video

- The photo feature is not supported in OLED models.

Supported Photo & Video Files

Supported External Subtitle Format

- *.smi, *.srt, *.sub (MicroDVD, SubViewer 1.0/2.0), *.ass, *.ssa, *.txt (TMPlayer), *.psb (PowerDivX), *.dcs (DLP Cinema)

NOTE

- Subtitles are not supported in certain models.
- Embedded subtitles are not supported.

Supported Video Codecs

Extension	Codec	
.asf	Video	VC-1 Advanced Profile (excluding WMVA), VC-1 Simple and Main Profiles
.wmv	Audio	WMA Standard (excluding WMA v1 / WMA Speech)
.avi	Video	Xvid (excluding 3 warp-point GMC), H.264/AVC, Motion Jpeg, MPEG-4
	Audio	MPEG-1 Layer I, II, MPEG-1 Layer III (MP3), Dolby Digital, LPCM, ADPCM, DTS
.mp4	Video	H.264/AVC, MPEG-4, HEVC
.m4v	Audio	Dolby Digital, Dolby Digital Plus, AAC, MPEG-1 Layer III (MP3)
.mov		
.3gp	Video	H.264/AVC, MPEG-4
.3g2	Audio	AAC, AMR-NB, AMR-WB
.mkv	Video	MPEG-2, MPEG-4, H.264/AVC, VP8, VP9, HEVC
	Audio	Dolby Digital, Dolby Digital Plus, AAC, PCM, DTS, MPEG-1 Layer I, II, MPEG-1 Layer III (MP3)
.ts	Video	H.264/AVC, MPEG-2, HEVC
.trp	Audio	MPEG-1 Layer I, II, MPEG-1 Layer III (MP3), Dolby Digital, Dolby Digital Plus, AAC, PCM
.tp		
.mts		
.mpg	Video	MPEG-1, MPEG-2
.mpeg	Audio	MPEG-1 Layer I, II, MPEG-1 Layer III (MP3)
.dat		
.vob	Video	MPEG-1, MPEG-2
	Audio	Dolby Digital, MPEG-1 Layer I, II, DVD-LPCM

Supported Photo File

File Format	Format	Item
jpeg, jpg, jpe	JPEG	<ul style="list-style-type: none">• Minimum : 64 x 64• Maximum<ul style="list-style-type: none">- Normal Type: 15360 (W) x 8640 (H)- Progressive Type: 1920 (W) x 1440 (H)
.png	PNG	<ul style="list-style-type: none">• Minimum : 64 x 64• Maximum: 5760 (W) x 5760 (H)
.bmp	BMP	<ul style="list-style-type: none">• Minimum : 64 x 64• Maximum: 1920 (W) x 1080 (H)

Viewing Photos and Videos

HOME / ↑ → 

- 1 Select your desired storage device.
- 2 Select and view your desired photo or video.

Tips for Playing Video Files

- Some user-created subtitles may not work properly.
- Some special characters in subtitles are not rendered.
- HTML tags are not supported in subtitles.
- Subtitles in languages other than the supported languages are not available.
- The screen may suffer temporary interruptions (image stoppage, faster playback, etc.) when the audio language is changed.
- A damaged video file may not play correctly, or some player functions may not be usable.
- Video files produced with some encoders may not be played correctly.
- If the video and audio structure of a recorded file is not interleaved, either video or audio is outputted.
- Video files other than the specified types and formats may not play correctly.
- Maximum bit rate of playable video file is 20 Mbps. (Motion JPEG: 10 Mbps only)
- We cannot guarantee smooth playback of files encoded level 4.1 or higher in H.264 / AVC.
- Video files more than 30 GB in file size are not supported.
- A video file and its subtitle file must be located in the same folder. A video file name and its subtitle file name must be identical in order to display the subtitle properly.
- Playing a video via a USB connection that does not support high-speed connection may not function correctly.
- Subtitles on a Network Attached Storage (NAS) device may not be supported depending on the manufacturer and model.
- Streaming of files encoded by GMC (Global Motion Compensation) or Qpel (Quarterpel Motion Estimation) is not supported.
- [For Ultra HD models only] Ultra HD image: 3840 X 2160
Some HEVC-encoded Ultra HD videos other than the content officially provided by LG Electronics may not be played. Some codecs can be used after upgrading software.

Extension	Codec	
.mkv	Video	H.264/AVC, HEVC
.mp4	Audio	Dolby Digital, Dolby Digital Plus, AAC, HE-AAC
.ts		

- Playable file sizes may vary depending on the encoding condition.
- The AAC Main profile is not supported.
- Video files created by some encoders may not play.

Scheduled Playing

- Only applies to certain models.

You can schedule your selected content to play at a certain time. (Scheduled playing is available with external inputs.)

HOME /   

- 1 Select your desired storage device.
- 2 Enter the folder that contains the file you wish to schedule.
- 3 Click the **NEW SCHEDULED PLAYING** button in the upper right.
- 4 Select the content that you would like to schedule to play.
- 5 Enter schedule details to create a new schedule.
- 6 Watch your selected content play at the set time.

Export

- Only applies to certain models.

HOME /   

- 1 Select your desired storage device.
- 2 Enter the folder that contains the file you wish to export.
- 3 Click the **EXPORT** button in the upper right.
- 4 Select the file you wish to export.
- 5 Click the **COPY / MOVE** button in the upper right and select the device to which you would like to export the file.
- 6 Check that the file has been copied or moved to the selected device.

Delete

HOME /   

- 1 Select your desired storage device.
- 2 Enter the path to the file you wish to delete.
- 3 Click the Delete button.
- 4 Select the file you wish to delete.
- 5 Click the Delete button at the top right.
- 6 Check that the file has been deleted from the list.

Music

Supported Music Files

File Format	Item	Information
.mp3	Bit rate	32 Kbps to 320 Kbps
	Sample freq.	16 KHz to 48 KHz
	Support	MPEG1, MPEG2
	Channels	Mono, Stereo
.wav	Bit rate	-
	Sample freq.	8 kHz to 48 kHz
	Support	PCM
	Channels	Mono, Stereo
.ogg	Bit rate	64 Kbps to 320 Kbps
	Sample freq.	8 kHz to 48 kHz
	Support	Vorbis
	Channels	Mono, Stereo
.wma	Bit rate	128 Kbps to 320 Kbps
	Sample freq.	8 kHz to 48 kHz
	Support	WMA
	Channels	Up to 6 channels

Playing Music

HOME / ↑ → 

- 1 Select your desired storage device. You can select the songs you would like to play across all storage devices in **My playlist**.
- 2 Select the desired music content and enjoy.

Delete

HOME / ↑ → 

- 1 Select your desired storage device.
- 2 Enter the path to the file you wish to delete.
- 3 Click the Delete button.
- 4 Select the file you wish to delete.
- 5 Click the Delete button at the top right.
- 6 Check that the file has been deleted from the list.

SuperSign Contents

Plays stored files using the Export option in SuperSign Editor.

To play back the stored files using the Export option

HOME /   

Only contents distributed by SuperSign Manager are displayed and selectable. If there is a USB/SD storage device connected, the image on the USB/SD device is outputted additionally.

NOTE

- If a folder named normal or AutoPlay exists on the USB/SD card and there are playable files, the files will play automatically when the USB/SD card is connected.
- OLED product types do not play content types other than single video or single flash files. Content produced via SuperSign Editor is not played either.

Information

To check the basic information of Signage Monitor

HOME /   

You can see the basic information on Signage Monitor.

You can also switch to **Smart Energy Saving Mode** or configure **Fail Over** settings. (You can switch to **Smart Energy Saving Mode** only when **Energy Saving Mode** is set to Off. The Smart Energy Saving mode is not available on OLED models.)

Local Contents Scheduler

- Only applies to certain models.

Setting a Scheduled Playing

You can create a scheduled playing using the **Local Contents Scheduler** and the **Photo & Video** app.

Scheduled Playing with Photo & Video

- 1st Method: Refer to the scheduled playing section in Photo & Video app.
- 2nd Method: HOME / ↑ → 
 - 1 Press the **NEW SCHEDULED PLAYING** button in the upper right.
 - 2 Press the **LOCAL CONTENTS** button.
 - 3 Select the storage device that you would like to schedule to play.
 - 4 Select the content that you would like to schedule to play after navigating to the **Photo & Video** app.
 - 5 Enter schedule details to create a new schedule.
 - 6 Watch your selected content play at the set time.

Scheduled Playing with External Input

HOME / ↑ → 

- 1 Press the **NEW SCHEDULED PLAYING** button in the upper right.
- 2 Select the **INPUT SOURCE**.
- 3 Enter schedule details to create a new schedule.
- 4 Watch your selected external input play at the set time.

Screen Share

- Only applies to certain models.

Allows the screens of devices such as a mobile device or Windows PC to be displayed on the monitor via wireless connections such as WiDi or Miracast.

Using Screen Share

HOME /   

- 1 Connect according to the instructions provided by the guide that can be accessed through the **CONNECTION GUIDE** button in the upper right.
- 2 Once the connection is established, Screen Share between the user device and the monitor is enabled.

NOTE

Configuring WiDi (Wireless Display)

WiDi, which is short for Wireless Display, is a system that wirelessly transmits video and sound files from a laptop that supports Intel WiDi to the display.

This is available only in certain input modes (Composite/Component/RGB/HDMI/DP/OPS/DVI-D). Other than these modes, LG Signage cannot be detected by your PC.

- 1 Connect your laptop to an AP. (This feature can be used without an AP, but it is recommended that you connect to it for optimal performance.)
Run the Intel WiDi  program on your laptop.
- 2 Any nearby LG Signages supporting WiDi are detected. In the list of detected displays, select a Signage to connect to and then, click Connect.
Enter the 8-digit PIN number (a) displayed on the Signage in the input field of your laptop (b) and click Continue.

Signage screen

Laptop screen

- 3 The laptop screen appears in the Signage screen within 10 seconds. The wireless environment may affect the screen from displaying.
If the connection is poor, the Intel WiDi connection may be lost.
 - LG Signage does not need to be registered.
 - For more information on how to use Intel WiDi, visit <http://intel.com/go/widi>.
 - This works normally with WiDi 3.5 or later versions.

Group Manager

- Only applies to certain models.

Using this template-based content editing program, you can produce, manage and play content. There are three modes: Master, Slave and StandAlone. The program can be used to distribute and play schedules between the Master and Slave. It also provides access from mobile device or PC.

CAUTION

- A maximum of 5,000 images stored on a USB drive/SD card can be displayed from your PC or mobile device. Images more than 5,000 cannot be displayed from your PC or mobile device. In addition, we recommend you store no more than 1,000 images for use on your USB drive or SD card. If you use more than 1,000 images, the images may not be displayed smoothly depending on your environment.
- Supported devices (Some features may not be available depending on the type or version of your device or browser.)
 - Android 4.4 or later (Chromium v.38.0)
 - iOS 8 or later (Safari v.600.1.4 or later)
 - PC: Chromium v.38.0
- Supported resolutions (this program is optimized for the following resolutions):
 - 360 x 640, 600 x 960, 375 x 667, 768 x 1024 and 1920 x 1080
- If you play UHD videos on a UHD model, videos with a high bitrate may not play properly due to the limitations of the processing speed.
- You can select Slave mode in Master mode when the monitors are connected to the same network.
- Video files larger than 50 MB may not upload properly from mobile devices. We recommend that you play such files via USB/SD storage devices.

Function

The following functions are provided according to the mode selected by the user. However, Slave mode is automatically set to the monitor selected in Master mode.

- Master
 - Group: Add / Edit / Delete / Control (Volume, Backlight, Reboot, Exit)
 - Content: Add / Edit / Delete
 - Schedule: Add / Edit / Delete / Distribute / Play
 - Edit PIN Number / Automatic USB Backup / USB Backup Restoration / Mail Settings / QR Code / Device Mode
- Slave
 - Plays the schedule distributed by the Master
- StandAlone
 - Content: Add / Edit / Delete
 - Schedule: Add / Edit / Delete / Distribute / Play
 - Edit PIN Number / QR Code / Device Mode

How to Use

- Monitors: Run the app in the Launcher bar and add/edit/delete the desired content.
- Mobile devices: Run the app in the Launcher bar and get access using the QR code or URL provided.

NOTE

- If you use a mobile device, you need to go through an authorization process using a PIN code. The default PIN code is '0000'.
- When using a PC, use the full screen (F11) feature in 1920 x 1080 (Full HD) resolution to view the same screen as the monitor.
- To delete a distributed schedule, disable the schedule and redistribute.

Supported Photo Files

File Format	Format	Item
jpeg, jpg	JPEG	<ul style="list-style-type: none"> • Minimum: 64 x 64 • Maximum: 1920 (W) x 1080 (H)
.png	PNG	<ul style="list-style-type: none"> • Minimum: 64 x 64 • Maximum: 1920 (W) x 1080 (H)

Supported Video Codecs

Refer to the 'Supported Video Codecs' table of **Photo & Video** app.

Tips for Playing Video Files

Refer to the 'Tips for Playing Video Files' subsection of **Photo & Video** app.

Leveler Tool

- Only applies to certain models.

You can check whether the product is horizontally and vertically level when installing the product outdoors in an enclosure.

Accessing the Leveler Tool

HOME /  → 

You can check whether the product is horizontally and vertically level.

Exiting the Leveler Tool

Exit the Leveler Tool by pressing the **EXIT** key on your remote control.

Checking the Angle of the Product

HOME /  → 

- You can check the tilt of the product using the bubble in the leveler and the angle indication.
- The left/right tilt is indicated by the leveler and angle indication on the left side of the screen.
- The front/back tilt is indicated by the leveler and angle indication on the right side of the screen.

NOTE

- If the product is tilted more than five degrees in any direction, an arrow will flash in the direction the product needs to be adjusted to.

Control Manager

- Only applies to certain models.

You can control and check the status of the display through web browser.

This function is available on PC and mobile device.

CAUTION

- Supported resolutions (this program is optimized for the following resolutions):
 - 1280 x 1024 / 375 x 667
- Supported browsers (this program is optimized for the following browsers):
 - IE 11 or later / Chrome 50 or later / Firefox 38 or later
- If set to OSD Portrait Mode, the OSD menu that appears on the captured screen will be in Landscape orientation.

Function

- **Dashboard** – Shows a summary of the product's status and provides links to each page.
- **Device Control** – Adjusts screen brightness, sound and input, reboots, etc.
- **Virtual Controller** – Shows the image displayed on the product in real time and enables remote control.
- **Picture** – Sets Picture Mode, Energy Saving, OSD Portrait, etc.
- **Network** – Sets Signage Name, IP Address, etc.
- **Time** – Enables or disables Set Automatically and shows the current time set for the product.
- **Check Screen** – Shows the product's current image output.
- **Door Monitor** – Shows whether the product is open or closed and provides controls for screen Mute for each status.
- **S/W update** – Provides firmware updates.
- **Charts** – Outputs information on the product's temperature, fan status, etc. in chart form.
- **Fan Status** – Shows the status of the fan installed in the product.
- **Log** – Displays product malfunction records.
- **System Information** – Outputs the product's S/W version, model name, etc.
- **Media Library** – Uploads media files to the product and outputs the uploaded file.

How to Use

On a PC

- 1 Enter 'https://Product IP address:3737' in the browser's address bar to access the Control Manager login page.
- 2 Enter the password in the Password window (The default password is '000000').
- 3 Click the **Login** button after entering the password to access the **Dashboard**.
- 4 Click the face-shaped image to access the User Menu (Change Password, Logout).

On a Mobile Device (by entering IP address)

- 1 Enter 'https://Product IP address:3737' in the browser's address bar to access the Control Manager login page.
- 2 Enter the password in the Password window (The default password is '000000').
- 3 Click the **Login** button after entering the password to access the **Dashboard**.
- 4 Click the Menu button in the upper left to expand the menu.
- 5 Click the face-shaped image to access the User Menu (**Change Password, Logout**).

On a Mobile Device (by QR code recognition)

- 1 Launch the Control Manager App.
- 2 Scan the QR Code with your smartphone to access the Login Page.
- 3 Click the **Login** button after entering the password to access the **Dashboard**.
- 4 Click the Menu button in the upper left to expand the menu.
- 5 Click the face-shaped image to access the User Menu (**Change Password, Logout**).

CAUTION

- For apps that do not support security protocols, access the Control Manager by entering the address displayed on the app's screen in your browser.

Follow the steps below if you encounter issues with your security certificate while attempting to access.

On Chrome

1 Click **ADVANCED**

2 Click **Proceed to product IP address (unsafe)**

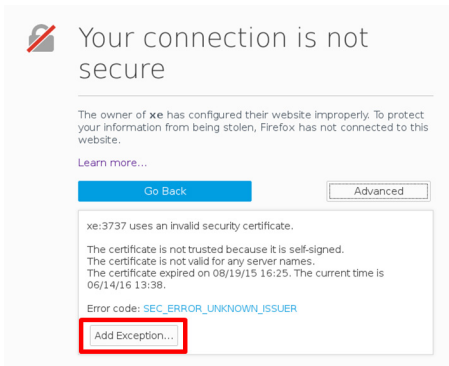

On FireFox

1 Click **Advanced**

2 Click **Add Exception...**

3 Click **Confirm Security Exception**

On Internet Explorer**1 Click Continue to this website (not recommended).**

The screenshot shows a security warning dialog box with a red shield icon containing a white 'X'. The text inside the dialog reads: "There is a problem with this website's security certificate." Below this, it states: "The security certificate presented by this website has expired or is not yet valid. The security certificate presented by this website was issued for a different website's address." It then explains: "Security certificate problems may indicate an attempt to fool you or intercept any data you send to the server." A bold recommendation follows: "We recommend that you close this webpage and do not continue to this website." There are three options at the bottom: "Click here to close this webpage." (with a green checkmark icon), "Continue to this website (not recommended)." (with a red shield icon and a red rectangular highlight around the text), and "More information" (with a blue question mark icon).

*The text of the links and buttons may differ depending on the OS (Operating System) or language settings used.

Multi-Screen

- Only applies to certain models.
- This feature allows you to view multiple external inputs and videos on a single screen.

Accessing Multi-Screen

HOME /  → 

Enter **Multi-screen** to select the screen layout.

! NOTE

- When entering **Multi-screen**, the screen may flicker and the picture may appear abnormal on certain devices while the optimal resolution is selected automatically. If this happens, please restart the monitor.

Selecting Screen Layout

When you enter **Multi-screen** without having set any screen layout, the screen layout selection menu appears.

If the screen layout menu does not appear, you can press the up arrow key on the remote control to go to the screen layout menu bar and select it to show the screen layout menu.

Closing Screen Layout Menu

From the screen layout menu, press the up arrow key on the remote control to go to the screen layout menu bar and select it or press the **BACK** key to close the screen layout menu.

Changing Screen Input

Press the  button on the top right of each split screen to select the desired input.

! NOTE

- Inputs which have already been selected for other split screens cannot be selected again. To select them, press the **RESET** button to reset the inputs for all screens first.
- PIP mode is only available when Content Rotation and OSD Portrait are set to 0.

Playing Videos on Split Screens

Press the  button on the upper right of each split screen, select **Video File**, and then select a storage device to view the list of videos in the selected device. Next, select your desired video from the list to play it.

! NOTE

- Videos created with HEVC, MPEG-2, H.264, or VP9 codecs can be played on split screens.
- When using PIP mode, the following combinations cannot be used.

Main	Sub
HEVC	HEVC
H.264	HEVC
MPEG-2	HEVC
VP9	VP9

PICTURE ID Settings

- Only applies to certain models.

PICTURE ID is used to change the settings of a specific set (display) using a single IR receiver for multi-vision. Communication is possible between a monitor with an IR receiver and other monitors using RS-232C cables. Each monitor is identified by a **Set ID**. If you assign the **PICTURE ID** using the remote control, only displays with matching **PICTURE ID** and **Set ID** can be controlled remotely.

- 1 Assign the **Set ID** to the installed monitors as shown below.

- 2 Press the red **ON** button on the remote control to assign the **PICTURE ID**.
- 3 Assign the **Set ID** to the selection of your choice.
 - A set with a different **Set ID** from the **PICTURE ID** cannot be controlled by IR signals.

! NOTE

- If **PICTURE ID** is set to 2, only the upper right monitor, which has a **Set ID** of 2, can be controlled by IR signals.
- If you press the green **OFF** button for **PICTURE ID**, the **PICTURE IDs** for all monitors are turned off. If you then press any button on the remote control, all monitors can be controlled by IR signals regardless of **Set ID**.

IR CODES

All models do not support the HDMI/USB function.

Some key codes may not be supported depending on the model.

Code (Hex)	Function	Remarks
08	 (POWER)	Remote control button
C4	MONITOR ON	Remote control button
C5	MONITOR OFF	Remote control button
95	Energy Saving	Remote control button
0B	INPUT	Remote control button

TO CONTROL MULTIPLE PRODUCTS

- Only applies to certain models.

Use this method to connect several products to a single PC. You can control several products at a time by connecting them to a single PC.

In the Option menu, the Set ID must be between 1 and 1000 without being duplicated.

Connecting the Cable

- The image may be different according to the model.

Connect the RS-232C cable as shown in the picture.

The RS-232C protocol is used for communication between the PC and product. You can turn the product on or off, select an input source or adjust the OSD menu from your PC.

Communication Parameter

Baud Rate: 9600 BPS

Data Length: 8 bit

Parity Bit: None

Stop Bit: 1 bit

Flow Control: None

Communication Code: ASCII code

! NOTE

- When using three-wire connections (non-standard), an IR daisy chain cannot be used.
- Be sure to only use the provided gender to connect properly.
- When monitors connected via Daisy Chain (that controls multiple monitors) are turned off and on successively, some monitors may not turn on. In this case, you can turn those monitors on by pressing the **MONITOR ON** button, not the **POWER** button.

* Note: Commands may not work when the external input is not used. Some commands may not be supported depending on the model.

Transmission/Reception Protocol

Transmission

[Command1][Command2][][Set ID][][Data][Cr]

- * [Command1]: identifies between the factory setting and the user setting modes.
- * [Command2]: controls monitor sets.
- * [Set ID]: Used for selecting a set you want to control. A unique Set ID can be assigned to each set ranging from 1 to 1000(01H~3E8H) under Settings in the OSD menu.
Selecting '00H' for Set ID allows the simultaneous control of all connected monitors.
(The maximum value may differ depending on the model.)
- * [Data]: Transmits command data.
Data count may increase depending on the command.
- * [Cr]: Carriage Return. Corresponds to '0x0D' in ASCII code.
- * []: White Space. Corresponds to '0x20' in ASCII code.

Acknowledgement

[Command2][][Set ID][][OK/NG][Data][x]

- * The Product transmits ACK (acknowledgement) based on this format when receiving normal data. At this time, if the data is FF, it indicates the present status data. If the data is in data write mode, it returns the data of the PC computer.
- * If a command is sent with Set ID '00' (=0x00), the data is reflected to all monitor sets and each monitor set does not send an acknowledgement (ACK).
- * If the data value 'FF' is sent in control mode via RS-232C, the current setting value of a function can be checked (only for some functions).
- *Some commands are not supported depending on the model.

01. Power (Command: k a)

Controls the power on/off of the set.

Transmission

[k][a][][Set ID][][Data][Cr]

Data 00: Off
01: On

Acknowledgement

[a][][Set ID][][OK/NG][Data][x]

*The acknowledgement signal is returned properly only when the monitor is fully powered on.

* There may be a delay between the transmission and acknowledgement signals.

02. Select Input (Command: x b)

Selects an input signal.

Data 00: Off

01: On

Acknowledgement

[b][][Set ID][][OK/NG][Data][x]

20. Off Timer (Repeat/Time) (Command: f e)

Configures Off Timer (Repeat/Time) settings.

Transmission

[f][e][][Set ID][][Data1][][Data2][][Data3][Cr]

Data1

1. f1h to f7h (reading data)

F1: reads the 1st Off Timer data

F2: reads the 2nd Off Timer data

F3: reads the 3rd Off Timer data

F4: reads the 4th Off Timer data

F5: reads the 5th Off Timer data

F6: reads the 6th Off Timer data

F7: reads the 7th Off Timer data

2. e1h-e7h (delete one index), e0h (delete all indexes)

E0: erases all Off Timer settings

E1: erases the 1st Off Timer setting

E2: erases the 2nd Off Timer setting

E3: erases the 3rd Off Timer setting

E4: erases the 4th Off Timer setting

E5: erases the 5th Off Timer setting

E6: erases the 6th Off Timer setting

E7: erases the 7th Off Timer setting

3. 01h to 0Ch (sets the day of the week for the Off Timer)

01: Once

02: Daily

03: Mon - Fri

04: Mon - Sat

05: Sat - Sun

06: Every Sunday

07: Every Monday

08: Every Tuesday

09: Every Wednesday

0A: Every Thursday

0B: Every Friday

0C: Every Saturday

Data2 00 to 17: 00 to 23 hours

Data3 00 to 3B: 00 to 59 minutes

* To read or delete the Off Time Schedule list, [Data2][Data3] must be set to FFH.

Example 1: fe 01 f1 ff ff - reads the first index data in Off Timer.

Example 2: fe 01 e1 ff ff - deletes the first index data from Off Timer.

Example 3: fe 01 04 02 03 - sets Off Timer to 02:03 from Monday to Saturday.

* This function is only available when Time 1 (year/month/day) and Time 2 (hour/minute/second) are set.

Acknowledgement

[e][][Set ID][][OK/NG][Data1][Data2][Data3][x]

21. On timer (Repeat/Time) (Command: f d)

Configures On Timer (Repeat/Time) settings.

Transmission

[f][d][][Set ID][][Data1][][Data2][][Data3][Cr]

Data1

1. f1h to f7h (reading data)

F1: reads the 1st On Timer data

F2: reads the 2nd On Timer data

F3: reads the 3rd On Timer data

F4: reads the 4th On Timer data

F5: reads the 5th On Timer data

F6: reads the 6th On Timer data

F7: reads the 7th On Timer data

2. e1h-e7h (delete one index), e0h (delete all indexes)

E0: erases all On Timer settings

E1: erases the 1st On Timer setting

E2: erases the 2nd On Timer setting

E3: erases the 3rd On Timer setting

E4: erases the 4th On Timer setting

E5: erases the 5th On Timer setting

E6: erases the 6th On Timer setting

E7: erases the 7th On Timer setting

3. 01h to 0Ch (sets the day of the week for the On Timer)

01: Once

02: Daily

03: Mon - Fri

04: Mon - Sat

05: Sat - Sun

06: Every Sunday

07: Every Monday

08: Every Tuesday

09: Every Wednesday

0A: Every Thursday

0B: Every Friday

0C: Every Saturday

Data2 00 to 17: 00 to 23 hours

Data3 00 to 3B: 00 to 59 minutes

* To read or delete an On Time schedule list, [Data2][Data3] must be set to FF.

Example 1: fd 01 f1 ff ff - reads the first index data from On Timer.

Example 2: fd 01 e1 ff ff - deletes the first index data from On Timer.

Example 3: fd 01 04 02 03 - sets On Timer to 02:03 from Monday to Saturday.

* This function is only available when Time 1 (year/month/day) and Time 2 (hour/minute/second) are set.

* This feature functions normally only after 22. On Timer Input has been entered.

Acknowledgement

[d][][Set ID][][OK/NG][Data1][Data2][Data3][x]

22. On Timer Input (Command: f u)

Select an external input for the current On Time setting and add a new schedule.

Transmission

[f][u][][Set ID][][Data1][Cr]

[f][u][][Set ID][][Data1][][Data2][Cr]

Data (Add schedule)

40: COMPONENT

60: RGB

70: DVI-D

90: HDMI1

91: HDMI2/OPS

92: OPS/HDMI3/DVI-D

95: OPS/DVI-D

98: OPS

D0: DISPLAYPORT

Data1 (Read schedule)

1. f1h to f7h (Read data)

F1: Select the 1st schedule input

F2: Select the 2nd schedule input

F3: Select the 3rd schedule input

F4: Select the 4th schedule input

F5: Select the 5th schedule input

F6: Select the 6th schedule input

F7: Select the 7th schedule input

Data2 (Read schedule)

FF

* To read the schedule input, enter FF for [Data2].

If no schedule is available for [Data1] when attempting to read the schedule data, the text 'NG' will be displayed and the operation will fail.

(Example 1: fu 01 90 - Move each schedule input down one row and save the 1st schedule input in HDMI mode.)

(Example 2: fu 01 f1 ff - Read the 1st schedule input.)

* This function is only supported when 1 (year/month/date), 2 (hour/minute/second) and On Time (repeat mode/time) are set.

* This feature operates as the last input.

* Input is possible in PC or DTV format during transmission and output is in PC format for acknowledgment.

(e.g. For HDMI1, both 0x90 and 0xA can be input, while 0xA0 is printed for acknowledgment.)

** This may not be supported on some models.

33. White Balance Green Gain (Command: j n)

Adjusts the white balance green gain value.

Transmission

[j][n][][Set ID][][Data][Cr]

Data 00 to FE: Green Gain 0 to 254
FF: checks the green gain value

Acknowledgement

[n][][Set ID][][OK/NG][Data][x]

36. White Balance Green Offset (Command: s y)

Adjusts the white balance green offset value.

Transmission

[s][y][][Set ID][][Data][Cr]

Data 00 to 7F: Green Offset 0 to 127
FF: checks the green offset value

Acknowledgement

[y][][Set ID][][OK/NG][Data][x]

34. White Balance Blue Gain (Command: j o)

Adjusts the white balance blue gain value.

Transmission

[j][o][][Set ID][][Data][Cr]

Data 00 to FE: Blue Gain 0 to 254
FF: checks the blue gain value

Acknowledgement

[o][][Set ID][][OK/NG][Data][x]

37. White Balance Blue Offset (Command: s z)

Adjusts the white balance blue offset value.

Transmission

[s][z][][Set ID][][Data][Cr]

Data 00 to 7F: Blue Offset 0 to 127
FF: checks the blue offset value

Acknowledgement

[z][][Set ID][][OK/NG][Data][x]

35. White Balance Red Offset (Command: s x)

Adjusts the white balance red offset value.

Transmission

[s][x][][Set ID][][Data][Cr]

Data 00 to 7F: Red Offset 0 to 127
FF: checks the red offset value

Acknowledgement

[x][][Set ID][][OK/NG][Data][x]

38. Backlight (Command: m g)

Adjusts the backlight brightness.

Transmission

[m][g][][Set ID][][Data][Cr]

Data 00 to 64: Backlight 0 to 100
Acknowledgement

[g][][Set ID][][OK/NG][Data][x]

39. Screen Off (Command: k d)

Turns the screen on or off.

Transmission

```
[k][d][ ][Set ID][ ][Data][Cr]
```

Data 00: turns the screen on
01: turns the screen off

Acknowledgement

```
[d][ ][Set ID][ ][OK/NG][Data][x]
```

- ** This may not be supported on some models.
- ** Dual-screen models must use the screen off commands in 88. Dual Screen Off.

40. Tile Mode (Command: d d)

Sets the Tile Mode and sets values for the tile rows and columns.

Transmission

```
[d][d][ ][Set ID][ ][Data][Cr]
```

Data 00 to FF: The first byte - tile column
The second byte - tile row

- * 00, 01, 10, and 11 mean that the tile mode is off
- ** The maximum value may differ depending on the model.

Acknowledgement

```
[d][ ][Set ID][ ][OK/NG][Data][x]
```

- * It may not be supported depending on the model.

41. Check Tile Mode (Command: d z)

Checks the tile mode.

Transmission

```
[d][z][ ][Set ID][ ][Data][Cr]
```

Data FF: checks the tile mode

Acknowledgement

```
[z][ ][Set ID][ ][OK/NG][Data1][Data2][Data3][x]
```

Data1 00: tile mode off
01: tile mode on
Data2 00 to 0F: tile column
Data3 00 to 0F: tile row

- * It may not be supported depending on the model.

42. Tile ID (Command: d i)

Sets the tile ID value of the product.

Transmission

```
[d][i][ ][Set ID][ ][Data][Cr]
```

Data 01 to E1: Tile ID 1 to 225**
FF: checks the tile ID

- ** The data value cannot exceed the value of row x column.

Acknowledgement

```
[i][ ][Set ID][ ][OK/NG][Data][x]
```

- * When a data value that exceeds the value of row x column is entered (except 0xFF), ACK becomes NG.

- * It may not be supported depending on the model.

43. Natural Mode (in Tile mode) (Command: d j)

When displaying the image naturally, the part of the image that would normally be displayed in the gap between the monitors is omitted.

Transmission

```
[d][j][ ][Set ID][ ][Data][Cr]
```

Data 00: Off
01: On

Acknowledgement

```
[j][ ][Set ID][ ][OK/NG][Data][x]
```

- * It may not be supported depending on the model.

44. DPM Select (Command: f j)

To set the DPM (Display Power Management) function.

Transmission

```
[f][j][ ][Set ID][ ][Data][Cr]
```

Data 00: Off
01: 5 seconds
02: 10 seconds
03: 15 seconds
04: 1 minutes
05: 3 minutes
06: 5 minutes
07: 10 minutes

Acknowledgement

```
[j][ ][Set ID][ ][OK/NG][Data][x]
```

45. Remote Control/Local Key Lock (Command: k m)

Adjusts the remote control/local key (front) lock.

Transmission

[k][m][][Set ID][][Data][Cr]

Data 00: Off (Lock Off)
01: On (Lock On)

* When the monitor is turned off, the power key works even in On (01) mode.

Acknowledgement

[m][][Set ID][][OK/NG][Data][x]

46. Power On Delay (Command: f h)

Sets the schedule delay when the power turns on. (unit: seconds).

Transmission

[f][h][][Set ID][][Data][Cr]

Data 00 to FA: min. 0 to maximum 250 (seconds)

* The maximum value may differ depending on the model.

Acknowledgement

[h][][Set ID][][OK/NG][Data][x]

47. Fail Over Select (Command: m i)

Selects an input mode for auto switch.

Transmission

[m][i][][Set ID][][Data][Cr]

Data 00: Off
01: Auto
02: Manual

Acknowledgement

[i][][Set ID][][OK/NG][Data][x]

48. Fail Over Input Select (Command: m j)

Selects an input source for auto switch.

* This command is only available when the Fail Over (auto) mode is set to Custom.

Transmission

[m][j][][Set ID][][Data1][][Data2][][Data3][][Data4]...[][DataN][Cr]

Data 1 to N-1 (Input priority: 1 to N-1)

40: COMPONENT
60: RGB
70: DVI-D
90: HDMI1
91: HDMI2/OPS
92: OPS/HDMI3/DVI-D
95: OPS/DVI-D
